

Airwell Sensibo

Airwell Sensibo is a controlling system that manages remote operation of your air conditioning, whatever the brand of your air conditioner, technology (Fixed speed or Inverter) or gas used (R22, R407C, R410A...). The system is easy to install and operate.

- Works on all type of A/C which operates with infrared remote controller.
- Easy installation with no wires to the unit.
- Can be transferred from one A/C to another.
- "Plug & Play" system composed by a hub and up to 10 pods to control your air conditioning.

CONFIGURATION
